INTRODUCTION

This Bulletin contains an analysis, in summary form, of the dwellings in Queensland as enumerated at the Census of 30th June, 1961. It is one of a series of Census Bulletins for the States and Territories and for Australia as a whole being issued as information becomes available from the first phase of machine tabulation. The information herein may be subject to minor amendment on completion of later tabulations.

Census Bulletin No. 14. - Summary of Population for Queensland was issued on 29th June, 1962. Census Bulletin No. 2 - Population and Dwellings in Local Government Areas, issued on 14th March, 1962, shows for each State the numbers of the population and occupied and unoccupied dwellings in each Local Government Area and in each major town, according to the Statistical Divisions in which they are situated. A list of 1961 Census Publications already issued appears at the end of this Bulletin.

In this Bulletin dwellings are classified according to class (i.e. private house, flat, etc.), material of outer walls, number of rooms, number of inmates, nature of occupancy, date of building, weekly rent and facilities. Each major table shows the numbers of dwellings, according to one particular characteristic (e.g., number of rooms or inmates of dwellings). At a later stage a more detailed analysis will be published showing particulars of dwellings in a series of cross-tabulations (e.g., the numbers of dwellings according to both numbers of rooms and inmates, etc.).

All information in this Bulletin is exclusive of full-blood aboriginals and of dwellings occupied solely by them.

DEFINITIONS AND SCOPE.

Occupied Dwellings: An occupied dwelling is any habitation occupied by a household group living together as a domestic unit, whether comprising the whole or only part of a building. The term has therefore a very wide reference and includes, in addition to houses and flats, a great variety of "dwellings" ranging from a single-roomed shack to a multi-roomed hotel or institution. Occupied dwellings are classified into "private" and "other than private" dwellings.

Private Dwelling: Private dwellings are further classified into the following four categories -

Private House: Private Houses include houses, sheds, huts, garages, etc. used for dwelling purposes, and shared private houses for which only one Householder's Schedule was received.

Share of Private House: A Share of a Private House is a portion of a shared private house which is occupied separately and for which portion a separate Householder's Schedule was furnished.

Flat: A Flat is part of a house or other building which can be completely closed off and which has its own cooking and bathing facilities.

Other Private Dwelling: These include private dwellings such as rooms, apartments, etc., which are parts of buildings but are not self-contained units.

Other than Private Dwelling: These include Hotels; Motels; Boarding Houses, Lodging Houses and Hostels; Educational, Religious and Charitable Institutions; Hospitals; Defence and Penal Establishments; Police and Fire Stations; Clubs; Staff Barracks and Quarters, etc.

Unoccupied Dwelling: These include vacant dwellings available for sale or renting; dwellings such as "week-ender", "holiday home", "second home", "seasonal workers' quarters", which were not occupied on the night of the Census; dwellings normally occupied but whose usual occupants were temporarily absent on the night of the Census; newly completed dwellings whose owners or tenants had not entered into occupation on the night of the Census; dwellings described as "to be demolished", "condemned", "deceased estate", "exhibition home", etc.; and buildings constructed as dwellings but used for non-dwelling purposes on the night of the Census. The total number of unoccupied dwellings shown for any area must not, therefore, be read as representing the number of vacant houses and flats available for sale or renting.

The detailed information in this Bulletin relates to private dwellings occupied at the date of the Census. However, information relating to the number of occupied dwellings other than private is given in Table 2 and a summary by urban and rural divisions of the State of unoccupied dwellings classified according to the reasons why the dwellings were unoccupied is shown in Table 10.

In the tables which follow, "Metropolitan Urban" relates to the City of Brisbane, the City of Redcliffe, and part of Pine Rivers Shire within boundaries determined for Census purposes. "Other Urban" relates to all other cities and towns (whether separately incorporated or not) with a population of 1,000 persons or more, and "Rural" to the remainder of the State.

The boundaries of the Metropolitan Urban Division and the composition of the Other Urban and Rural Divisions as used for 1961 Census purposes differ from those used for 1954 Census purposes. Adjustments have been made to the 1954 figures in Table 1 in this Bulletin in order to provide approximate comparison on the 1961 Census basis, but in Tables 2 to 6 and 8 no adjustments have been made to 1954 figures. The effect of the changes referred to may be measured by comparing the data in Table 1A with the 1954 data in Table 1, and this effect must be borne in mind when making intercensal comparisons in the other tables.

DWELLINGS IN QUEENSLANDCENSUS, 30TH JUNE, 1961.

1. Summary of Population and Dwellings. - The following table shows the urban and rural distribution of the population and dwellings in Queensland at the Censuses of 1954 and 1961. The figures shown for the 1954 Census have been adjusted to conform to the boundaries used in 1961.

(a) In 1958 the area of Queensland was revised by the Queensland Surveyor-General. The 1954 Area shown in this table has been adjusted on this revised basis in accordance with 1961 Census boundaries. (b) Includes migratory population (persons on ships, long-distance trains, motor coaches or aircraft) not included in Urban or Rural Divisions. (c) Excludes migratory. (d) Private and non-private. (e) Occupied and unoccupied dwellings.

Similar adjustment of 1954 data cannot be provided in the tables which follow but comparison of the figures in Table 1A with the 1954 figures in Table 1 will show the effects of changes made between the Censuses. These effects should be borne in mind when making intercensal comparisons in other tables.

(a) For definitions see page 3. (b) In respect of which a separate Householder's Schedule was furnished. (c) Includes "caretakers' quarters" which in 1961 were classified as private dwellings.

Private houses constituted 89.3 per cent. and flats 7.7 per cent. of all occupied private dwellings in 1961 compared with 90.4 per cent. and 5.0 per cent. respectively in 1954. The number of flats increased by 80.2 per cent. since 1954. The total number of occupied private dwellings increased by 17.8 per cent.

3. Occupied Private Dwellings according to Material of Outer Walls. - Wood was the most frequently used material for outer walls in Queensland. At 30th June, 1961 it was used in 75.5 per cent. of those occupied private dwellings where material of outer walls was stated compared with 79.1 per cent. in 1954.

Private Dwellings with outer walls of fibro-cement were second in numerical importance in 1961, as in 1954, increasing from 10.9 per cent. of total occupied private dwellings (with stated material of outer walls) in 1954 to 14.8 per cent. in 1961.

Brick, fourth in numerical importance in 1954, rose to third place in 1961 displacing iron which fell to fourth. In 1961 dwellings with walls of brick and iron represented 4.4 per cent. and 3.0 per cent. respectively of total occupied private dwellings compared with 3.3 per cent. and 4.5 per cent. respectively in 1954.

In the Metropolitan Urban Division of State 79.3 per cent. of dwellings had outer walls of wood in 1961 compared with 72.2 per cent. in "Other Urban" and 73.3 per cent. in "Rural". The proportion of total dwellings with brick walls was greatest in "Metropolitan Urban" (7.0 per cent.) while the proportion with walls of fibro-cement was greatest in "Other Urban" (18.8 per cent.).

The highest percentage increase between Censuses was recorded by occupied private dwellings with walls of concrete, 73.6 per cent.; followed by fibro-cement, 60.3 per cent.; brick, 55.7 per cent.; wood, 12.4 per cent.; and stone, 10.1 per cent. There was a decrease of 22.2 per cent. in the number of dwellings with walls of iron.

NOTE: Kitchen and permanently enclosed sleep-out are included in number of rooms but not bathroom, pantry, laundry or storehouse.

At 30th June, 1961 four, five and six roomed occupied private dwellings together accounted for 69.5 per cent. of those occupied private dwellings where number of rooms was stated. In 1954 the proportion was 69.6 per cent. In both 1961 and 1954 private dwellings with five rooms were the most numerous and represented 29.1 per cent. and 27.1 per cent. respectively of private dwellings with stated number of rooms. Flats with four rooms were the most numerous at both Censuses.

The greatest proportional increases in the numbers of occupied private dwellings since the 1954 Census occurred in eight, nine, and ten roomed private dwellings which increased by 28.6 per cent., 32.4 per cent., and 37.2 per cent. respectively.

The total number of flats showed a greater proportional increase than the number of any other class of dwelling and this applied generally throughout the size range. In particular there were large increases since 1954 in the numbers of one, two, and three roomed flats, the increases being 566.7 per cent., 202.2 per cent., and 105.2 per cent. respectively.

A trend towards private houses with more rooms is indicated in the average number of rooms per private house which in 1961 was 5.60 compared with 5.47 in 1954. The average number of rooms per private dwelling was greatest in the Rural Division of State.

5. Occupied Private Dwellings according to Number of Inmates. - The following table shows the number of occupied private dwellings classified according to number of inmates at the Censuses of 1954 and 1961.

The greatest proportional increase since 1954 in the number of occupied private dwellings occurred in those with one inmate, the growth of 36.1 per cent. being due to an increase of 30.3 per cent. in the number of private houses with one inmate and an increase of 110.0 per cent. in the number of flats with one inmate.

The numbers of flats with two and three inmates underwent substantial increases of 74.6 per cent. and 64.2 per cent. respectively since 1954.

At 30th June, 1961 dwellings with less than 6 inmates represented 84.9 per cent. of total occupied private dwellings compared with 85.5 per cent. in 1954.

Dwellings with 6 or more inmates increased by 22.3 per cent. between Censuses while those with less than 6 increased by 17.0 per cent.

Two-inmate dwellings were the most numerous in 1961 and 1954, accounting for 23.5 per cent. and 22.7 per cent. respectively of total occupied private dwellings.

The average number of inmates per private dwelling for Queensland fell from 3.63 in 1954 to 3.61 at 30th June, 1961. In private houses the average rose from 3.72 in 1954 to 3.74 in 1961, in flats it fell from 2.67 to 2.66 while in shares of private houses the average was constant at 2.86. There was a lower average in 1961 in the Metropolitan Urban and Rural Divisions of State but a higher average in "Other Urban".

6. Occupied Private Dwellings according to Nature of Occupancy. - The following table shows the nature of occupancy of private dwellings at the Censuses of 1954 and 1961.

The most significant feature of this table is the increase in the number of occupied private dwellings being purchased by instalments. Of those occupied private dwellings where nature of occupancy was stated the proportion being purchased by instalments rose from 14.8 per cent. in 1954 to 19.1 per cent. in 1961. This increase occurred principally in the number of private houses being purchased by instalments, the proportion of which rose from 16.2 per cent. in 1954 to 21.1 per cent. in 1961.

The proportion of owner-occupied dwellings declined from 55.0 per cent. in 1954 to 53.0 per cent. in 1961. The proportion of tenanted non-governmental dwellings also declined from 23.5 per cent. to 22.2 per cent.

The proportional increases since 1954 were: - purchaser by instalments, 51.8 per cent.; owner, 13.6 per cent.; and tenant (non-governmental dwellings) 11.1 per cent.

The proportion of owned private dwellings was greatest in rural areas (65.1 per cent. in both 1961 and 1954) whereas the proportion of private dwellings which were either owned or being purchased by instalments was greatest in the metropolitan division (74.3 per cent. in 1961 compared with 71.8 per cent. in 1954).

7. Occupied Private Dwellings according to Date of Building. - Table 7 shows date of building of occupied private dwellings as tabulated from the replies given at the 1961 Census.

Of those occupied private dwellings in Queensland where date of building was stated 20.8 per cent. were built after 30th June, 1954. In the Metropolitan Urban Division of State 20.5 per cent. were built after 30th June, 1954 while in "Other Urban" and "Rural" the proportions were 21.5 per cent. and 20.1 per cent. respectively.

8. Weekly Rent (Unfurnished) of Tenanted Private Dwellings. - The following table shows the rents paid for unfurnished private dwellings (excluding dwellings occupied by "Tenants (Governmental Housing)" in 1954 and "Tenants (Queensland Housing Commission)" in 1961) in Queensland, as compiled from information supplied on individual Householders' Schedules at 30th June, 1954 and 1961. Of those tenanted private dwellings for which rent (unfurnished) was stated, 40.5 per cent. had rentals below 50s. in 1961 compared with 80.9 per cent. in 1954. In the range 50s. and under 100s. the proportion rose from 18.1 per cent. in 1954 to 43.0 per cent. in 1961. The proportion in the 100s. and over category rose from 1.0 per cent. in 1954 to 16.5 per cent. in 1961.

In 1961, 13.6 per cent. of tenanted private houses (with stated rent) and 30.8 per cent. of tenanted flats were in the rental range 100s. and over.

With rents under 60s. the metropolitan proportion of the State total was 25.0 per cent.; with rents 60s. - 100s. it was 33.8 per cent.; and with rents 100s. and over, 55.6 per cent.

9. Occupied Private Dwellings according to Facilities. - The following table shows the facilities - gas, electricity, television set - recorded for each class of private dwelling in Urban and Rural Divisions of the State.

The question on facilities was answered for 389,353 occupied private dwellings in Queensland. Of these 241,976 (62.1 per cent.) had electricity but not gas and 123,745 (31.8 per cent.) had both electricity and gas, making a combined total of 365,721 (93.9 per cent.) with electricity. Occupied private dwellings with gas but not electricity numbered only 642 (0.2 per cent.).

In the Metropolitan Urban Division 99.4 per cent. of occupied private dwellings had electricity while in the Other Urban and Rural Divisions the proportions with electricity were 98.5 per cent. and 75.6 per cent. respectively.

The proportion of private dwellings with both electricity and gas was 54.4 per cent. in "Metropolitan Urban", 22.7 per cent. in "Other Urban" and 1.7 per cent. in "Rural".

The number of occupied private dwellings in Queensland stated to have a television set was 116,953 of which 89,274 (76.3 per cent.) were in the Metropolitan Area. In the Metropolitan area of Brisbane 53.4 per cent. of occupied private dwellings were stated to have a television set.
